TO WHOM IT MAY CONCERN

This is to confirm that I have known Pieter de Weerd of Dastek for the past 10 years both personally and in a professional capacity.

During the past 9 years we have successfully used Dastek technology in many areas of our motorsport programme. To date we have won 7 South African Production Car Championships in various classes utilising Dastek's Unichip Technology.

The Unichip Technology has also enabled us to win endurance races and many victories in fuel economy runs, demonstrating their ability to fine tune the engines, not only for performance but economy as well.

Pieter de Weerd of Dastek has provided Nissan Motorsport, not only with the latest technology in ECU refinement but also has conducted his business in a very efficient and professional manner.

Yours sincerely,

G O HALL
