TO WHOM IT MAY CONCERN

This serves to confirm that Toyota South Africa has made extensive use of Mr. Pieter de Weerd's company, Dastek, for many years as an outside supplier of components to improve the performance of the company's racing, rally and Total Economy Run vehicles. Dastek also provides excellent service in setting up the vehicles for optimum performance on their chassis dynamometer.

Attached are relevant media releases relating to the Economy Run, which Toyota has dominated for the past six years, as well as other fuel economy projects. The latter included driving from Johannesburg to Cape Town (more than 1400 km) on one tank of fuel with a Camry and towing a caravan from Johannesburg to Durban on one tank of fuel (also with a Camry).

We receive outstanding cooperation from Dastek, with the company often working after normal hours to prepare our vehicles. We have also not had any "come backs" from using Dastek's special components.

Yours faithfully,

FRANCOIS LOUBSER
Director : Marketing Communications
